RE: FOUNTAIN, TONY
Date of Birth: 08/24/63
Patient No: 12637

EXAM: MRI LUMBAR SPINE, WITHOUT CONTR 03/22/94

Dear Dr. Lyrene:

Thank you for referring your patient to Advanced Medical Imaging Center. The findings of my examination are as follows:

The lumbar spine is in good position and alignment. All vertebral bodies have normal height and show normal signal intensity. There are mild degenerative changes of the L4-L5 and L5-S1 discs. There is mild desiccation and dehydration of the disc material, and there is a small herniated disc at the L5-S1 level protruding into the right neural canal near the right neural foramina, possibly causing some nerve root compression on the right side at this level. No other significant findings.

If you have any questions concerning the radiographic findings on this patient, please call me.

Sincerely,

H. PETER JANDER, M.D.

HJ /RL

Comment

MB

If initial LDL-cholesterol result is >100 mg/dL, assess for risk factors and refer to the ATP-III table below.

Risk Category	LDL Goal	LDL Level (mg/dL)	LDL Level (mg/dL)
	mg/dL	at which to initiate Therapeutic Lifestyle Changes (TLC)	at which to consider Drug Therapy
